

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

DATE: November 5, 1984

SUBJECT: PA Review-Decca Xagon

FROM: Jeff Rosenbloom

TO: Paula Bisson

Paula-

This site should be placed in the PENDING category. To continue the investigation would require a major expenditure of funds to drill through the existing asphalt to characterize the site. In addition, groundwater is not used as a source of drinking water in the area (surface waster is the only source of drinking water in San Francisco).

I concur that the site should be pending. While wastes may have been deposited in the past, the site is currently paved and a site investigation at this time is not warranted.
